PURE™ Sustainability
Bringing together complex data in a flexible, robust system, meeting both internal and external reporting needs is a powerful support for your organization’s sustainability programs. Easy to use tools that automate time-consuming tasks, validate data quality and provide your team with accurate, real time reports and dashboards are essential to measure performance, manage risk, drive cost reductions and identify initiatives.

OUR SOLUTION

PURE™ Sustainability makes it easy to collect reliable data across your whole organization, whether you collect data centrally or delegate it worldwide. We help you gather and analyze the data needed to manage your CSR and Sustainability programs and meet a range of external requirements including the CDP, GRI, DJSI, and UN Global Compact. PURE Sustainability gives you the data you need to create and track new sustainability initiatives in your organization.

KEY FEATURES AND BENEFITS

- Consolidate information for ongoing performance management, external disclosure, and strategic decision-making
- Report to frameworks such as CDP, GRI, DJSI, SASB, and UN Global Compact.
- Intuitive and user-friendly system to simplify data collection
- Quality checks on data to ensure you are getting reliable information
- A full audit trail to support external assurance for your reporting
- Flexible reporting tools like customizable charts, tables, and dashboards
- Real time meter reading and management
- Energy Star, Urjanet, and GRESB integration

A CLOSER LOOK AT PURE SUSTAINABILITY

HOW DO I COLLECT THE INFORMATION?

• Integrate with existing systems or even pull data straight from your energy suppliers, streamlining and automating data collection wherever possible
• Delegate online forms and collect data with approval steps
• Import data from MS Excel
• Keep a full audit trail in the system to make third party assurance more robust and less complicated

WHAT REPORTING AND MANAGEMENT TOOLS WILL I GET?

• Real time dashboards for every level of your organization
• Automatically generate and send performance reports to each of your facilities
• Dashboard views of performance against targets
• Scorecard view to distill complex performance data into simplified traffic light overviews
• Interactive maps to view information spatially

HOW DO I COMMUNICATE PERFORMANCE?

Corporate Responsibility is about more than collecting and holding data, it’s about sharing it with your stakeholders in a transparent manner. We take our clients beyond the first hurdle of data collection and give them tools to support their (award winning) reporting:

• Collaborative, certified tools manage and simplify your responses to critical frameworks like CDP, GRI and DJSI
• Export print quality, branded images
• Configure and share dashboard views with your users
• Automatically export charts directly to your intranet or corporate website
• Integrate our dashboards, mapping tools, and more with your website
