

PureOHS™ Clinical Suite Module

PureOHS™ supplies the industry with the best tracking, analysis and reporting tools for employee health, medical and safety management.

That includes powerful, easy-to-use tools to help you meet the daily challenges of patient encounter management and clinic management: scheduling and tracking appointments, collecting patient data and more.

Appointment Scheduling

Schedule your patients easily with customizable views and drag-and-drop capabilities.

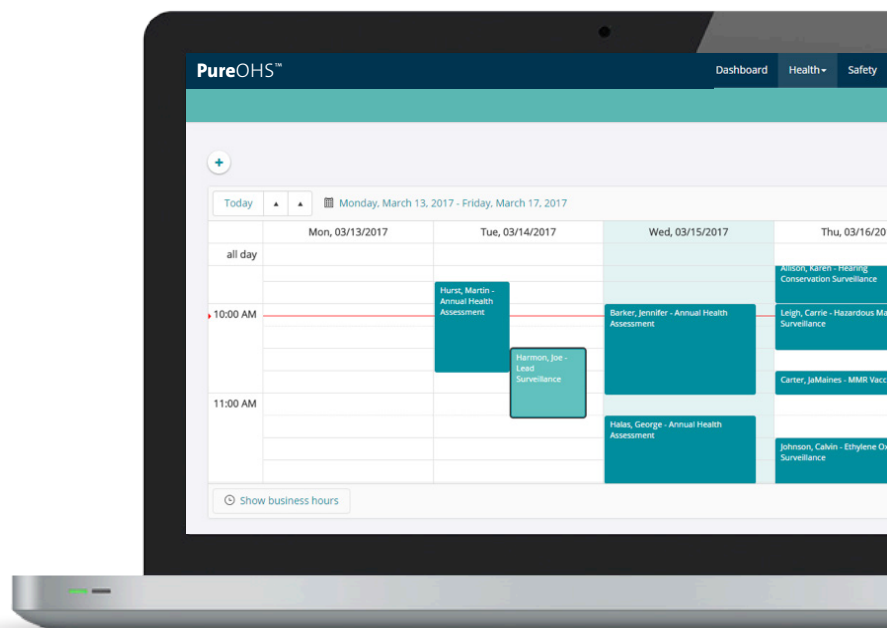

Detailed Patient Encounters

Documenting patient encounters is vital to caring for the customer and meeting legal obligations. But many providers find electronic tools difficult to use and more of a burden than an assistant to providing patient care. PureOHS integrates with UL's market-leading SYSTOC for occupational medicine clinics. The system has proven that clinicians can configure it to optimize their own experience while creating complete documentation with ease.

Key benefits

It's crucial to not only track encounters but also be able to easily distribute the information to other appropriate people and programs. Track occupational and non-occupational cases, including diagnosis, cause of injury, treatment plans and doctor and nurse notes.

- Nurses' log for encounter tracking
- EMR system with one-click access to patient history, medications, medical conditions and more
- Simplified data entry and management
